

IMPACT SECTION FOR COMMERCIAL SECTIONAL STEEL DOORS

Our Impact Section is the perfect solution for doors exposed to damage from forklifts and other warehouse traffic. Replacing a traditional bottom section with the Impact Section reduces down time and costly repairs.

IMPACT RESISTANT

- Impact-resistant composite skins surround an expanded polystyrene core

FULLY ADAPTABLE

- Adjustable to multiple door thicknesses
- Hinge and section adapters provide a superior fit

DOOR COMPATIBILITY

- Sectional Steel door Models 216, 220, 2411, 2415, C-20, C-24, C-2400
- ThermoMark™ Models 5150, 5155, 5200, 5255
- Thermospan® Models 150, 200
- Available in 21" and 24" sections
- Available from 8'2" to 16'2" wide in one foot increments
