FOR IMMEDIATE RELEASE

Wayne-Dalton Donates, Installs Model 9100 Door to American Cancer Society

After Difficult Year, New Albany, Ohio, Resident Will Receive New Garage Door

DALLAS (Sept. 5, 2012) – After going through years of financial struggle and the loss of a loved one, a Central Ohio resident is getting a helping hand with a home fix-up project from Wayne-Dalton.

Wayne-Dalton, a world-class leader in the garage door industry for more than 50 years, is donating two Model 9100 garage doors to the American Cancer Society of Central Ohio for one of the society's employees.

"Wayne-Dalton has a history of donating high quality garage doors and service to charitable organizations and good causes in our communities," said Chuck Haba, vice president of engineering at Wayne-Dalton. "We're proud to take part in this project with one of our best vendor partners, TDCI."

An American Cancer Society of Central Ohio employee, Diane Burack was selected as a recipient of the Wayne-Dalton donation after caring for her mother through a long, and ultimately unsuccessful, fight against cancer. Throughout the past several years, Burack acted as her mother's primary care giver and financial supporter. This meant that many projects around her home, including replacement of damaged garage doors, fell by the wayside.

Wayne-Dalton's corporate engineering department and Columbus, Ohio-based TDCI Inc., an enterprise software solutions firm, will install the Model 9100 doors at Burack's home on September 21, 2012. TDCI will be assisting with the installation in an effort to apply what they learn to a project they are working on for Wayne-Dalton.

"Offering safety, beauty and durability at an affordable price, the Wayne-Dalton Model 9100 insulated steel garage doors will be a terrific complement to Ms. Burack's home," said Haba.

The Wayne-Dalton Model 9100 garage door includes a number of features that make it stand out from competing garage door brands. All Model 9100 doors come with foamed-in-place polyurethane insulation that has an R-Value of 9, which helps to control home energy costs and block street noise. Model 9100 doors also feature pinch-resistant doors panels that push fingers out of harm's way if accidentally placed near a closing door. The doors also include TorqueMaster[®], Wayne-Dalton's exclusive counterbalance system that seals springs safely and cleanly inside a steel tube.
