FOR IMMEDIATE RELEASE

Wayne Dalton Introduces Four New Doors at 2013 IDAExpo™

LEWISVILLE, Texas (May 10, 2013) – Wayne Dalton will showcase four new doors at this year's IDAExpo™ in Nashville, Tenn.: one residential model, two residential designs and one commercial sectional door.

The new Wayne Dalton offerings, on display at booth #939, meet the demands of homeowners by providing enhanced design options and the needs of commercial customers who are looking for the latest in thermal efficiency.

“Our engineers have been hard at work over the past twelve months,” said Ali Isham, brand manager at Wayne Dalton. “This year’s IDAExpo is an exciting time for us because we have the opportunity to show our dealers that we are listening to their requests and providing them with new solutions that will give them a competitive advantage in the field for both residential and commercial door sales.”

Residential doors on display include the new Carriage House Steel Model 6600, new options on the Classic Steel Model 8300, and the popular Carriage House Steel Model 9700. The soon-to-be released Model 6600 will be featured in the Somerset design with Arch Stockton windows and decorative hardware. The new Walnut and Golden Oak wood-grain color finishes available in the Sonoma panel on the Model 8300 will also be highlighted at the show. These residential design options will be available to the market on May 20, 2013.

The ThermoMark 530, Wayne Dalton’s first 3-inch-thick, polyurethane-insulated commercial sectional door will also be on display. The door, which will also be released on May 20, 2013, is designed to deliver optimal performance and is rated as one of the strongest, most thermally efficient commercial sectional doors on the market.
