FOR IMMEDIATE RELEASE

Wayne Dalton Expands Carriage House Steel Door Collection with Insulated, Durable Model 6600

LEWISVILLE, Texas (May 20, 2013) – Wayne Dalton combines strength and efficiency with the classic look of a carriage house style door in its newest model, the Wayne Dalton Model 6600 steel garage door.

Quiet, durable and stylish, the Model 6600 provides dealers and their customers with a premium door that offers the highest R-Value in the Wayne Dalton carriage house steel collection.

“With the Model 6600, our dealers have a premium product to offer homeowners that is both attractive and tough,” said Daniel Christian, senior product manager for Wayne Dalton. “Wayne Dalton designed and built this door with durability in mind. And because it can be ordered in a variety of styles, the customer will be happy with a door that enhances the look of their home.”

One of Wayne Dalton’s most robust garage door models, the Model 6600 door is constructed with two layers of steel for increased sturdiness and smooth DecaTrim II overlays that are treated to resist termites and fungal decay.

The Model 6600 is also designed to help improve the thermal efficiency of a home. Its foamed-in-place polyurethane insulation delivers a calculated door section R-value of 12.12, and the door is constructed with snug-fitting, tongue-and-groove section joints that help to reduce wind and precipitation from entering the garage.

Homeowners with living space above or adjacent to the garage will find the Model 6600 delivers quiet operation. Heavy-duty 14 gauge hinges provide stability and maximum strength between sections that translate to smooth and quiet door operation. The Model 6600 also features ball-bearing rollers with nylon wheels and solid steel shafts for smooth, quiet and dependable service.

“The Model 6600 offers a wide range of carriage house design possibilities,” said Ali Isham, brand manager for Wayne Dalton. “So creating a unique, custom look for a home is easy with the eight panel designs, four colors, six window patterns and six different styles of decorative hardware options.”
