

ROLLING DOOR SYSTEMS

WAYNE-DALTON COMMERCIAL DOOR SYSTEMS

IT'S NOT JUST THE RIGHT CHOICE.
IT'S THE BEST CHOICE.

WAYNE-DALTON

Rolling Door Systems

Wayne-Dalton Rolling Doors have a long history of excellence in the design and construction of doors that have met and often exceeded the needs and expectations of even the most critical projects.

Originally, Wayne-Dalton began its rolling door experience with the acquisition of North American Door in Lindenhurst, New York. From there, the consolidation of North American with another acquisition, Kinneer, made Wayne-Dalton a dominant force in the product category. Kinneer was the original inventor of rolling slat doors, dating back to the late 1800s, and brought to Wayne-Dalton experience and proprietary technology unequalled in the industry.

With numerous innovations created and experience acquired over the years, Wayne-Dalton continues to lead all other manufacturers with both standard and custom-made doors made from a variety of materials and colors to meet almost any need.

So whether it's the enormous Titan rolling doors, protective Series 800 fire service doors, ventilated Secur-Vent doors, or secure Accordion-Folding Grilles, you can feel confident that with Wayne-Dalton's many years of knowledge and experience, you will get the best possible solution for your building application needs.

GUIDE TO ROLLING DOORS

Choosing the right rolling door for a specific application can seem like a challenge, but it doesn't have to be.

The following chart should help you narrow down your search to one or two relevant models.

Use this guide to help determine which doors might be best for your specific application. Each door model offers a variety of sizes, options and custom configurations. For more information, including detail drawings, specifications and other technical information, contact the Wayne-Dalton Rolling Door Group at 800-255-3046 or visit us online at www.wayne-dalton.com/commercial.

	max width	max height	fire labeled	windload rated*	construction	available gauges

WAYNE-DALTON

Rolling Service Doors, Counter Shutters, Fire Doors and Grilles

The Wayne-Dalton line of Rolling Door Systems features service doors, fire doors, counter shutters and grilles designed to fit a wide range of applications. However, in many instances, a specific application calls for a specialized door that doesn't quite fit one of our standard models. These situations are an ideal time to call on our highly skilled product team for help.

Our Rolling Door Group customer service managers and engineers can help you determine precisely what your needs are and whether modifying an existing door design to meet your criteria would be feasible. From engineering over-sized doors (in some cases, more than 800 square feet!), to modifying doors to accommodate man doors or other obstructions, these individuals have a great deal of experience at customizing doors to meet our customers' unique needs.

If you can't find the perfect door for your application, contact our Rolling Door Group at 800-255-3046 to discuss your needs and see if customizing a door for your job is the right way to go.

800 SERIES ROLLING SERVICE DOORS

Designed for strength and durability, Wayne-Dalton's 800 Series doors are available in a variety of materials, slat shapes and colors.
