

Waynegard Series™

3" Vertical Track Extension

Installation Instruction Insert

Wayne Dalton, a division of Overhead Door Corporation
P.O. Box 67
Mt. Hope, OH 44660
www.Wayne-Dalton.com

Use this insert in conjunction with the installation instructions provided with the door. The 3" track extension is provided for 12" radius track system applications. This extension can be used to raise the horizontal track to the level of a 15" radius track system in order to clear an obstruction, or to provide a decrease in hang down associated with 12" radius track systems. Using the extension will increase the amount of headroom required by approximately 3".

Slide the 3" track extension onto the bottom of the vertical track. Using the pre-punched holes in the 3" track extension as a template, drill (2) 9/32" diameter holes in the vertical track. Secure the 3" track extension to the vertical track using (2) 1/4 - 20 x 9/16" track bolts and whiz nuts. Repeat for the other side.
