Made with two layers of steel and polyurethane foam insulation, Models 8300 and 8500 are extremely durable.

Not only that, they are offered in five designs with durable factory-finished colors or an optional bi-directional wood-grain finish that emulates the beauty of real wood.

**PERFORMANCE FEATURES**

**Insulation**
Models 8300 and 8500 come with foamed-in-place polyurethane insulation with an R-value* of 12.12 for Model 8300 and R-value of 16.22 for Model 8500. Insulation can improve your home’s thermal efficiency, reduce street noise, and make the door operate more quietly.

**Effective Joint Seals**
Snug-fitting tongue-and-groove section joints reduces wind and weather from entering the garage.

**Heavy Gauge Steel End Caps**
Wrap-around end caps trim out door edges for better appearance, improved strength and protect the insulation from damage.

**High Cycle Spring Option**
Choose a 25,000 cycle spring for almost twice the life of a standard torsion spring.

**Silent Glide Rollers**
Nylon rollers with solid steel shafts provide years of smooth, quiet and dependable operation.

Available with optional hardware and reinforcement for high-wind regions.

**Warranty**
Models 8300 and 8500 offer a Limited Lifetime Warranty on the steel skin. See full text of warranty for details.

*Wayne Dalton uses a calculated door section R-value for our insulated doors.
