## **FOR IMMEDIATE RELEASE**

### **WAYNE DALTON INTRODUCES NEW OPTIONS FOR GARAGE DOORS**

*New Designs for Carriage House Steel Garage Doors and New Color Options Now Available*

**LEWISVILLE, TEXAS** (May 26, 2015) – Homeowners now have two new designs to choose from when working with their Wayne Dalton dealer to upgrade their garage door. The Hampton and Camden mixed panel designs offer a new look to the popular 9405 and 9700 Carriage House Steel models.

The Hampton design includes flush panels with off-centered vertical overlays to create a modern carriage house look. The Camden design features flush panels with horizontal rails that separate each section to provide a clean, unique style for any home.

Wayne Dalton's steel garage door Model 9700 is stylish and versatile, offering a variety of carriage house designs, large windows and multiple colors and stain options. The Model 9405 Carriage House Steel garage doors feature pinch-resistant door panels and a steel backer along with six other panel designs and a wide selection of colors.

"The Hampton and Camden panels offer two totally different options that work well with a number of home designs," said Mark Sawicki, residential steel product manager for Wayne Dalton. "Our Carriage House Steel models offer low-maintenance, thermally efficient garage doors that offer an assortment of options so homeowners can create a distinctive door for their home."

In addition to the new design options, Wayne Dalton is expanding color options for several residential and commercial models. Black is now available on residential Model 8500 and on ThermoMark™ 5200 commercial doors.
