FOR IMMEDIATE RELEASE

Wayne Dalton Adds New Color, Four New Designs to Carriage House Steel Collection *Model 6600 Doors Now Offer Combined 22 Designs in Five Colors*

LEWISVILLE, Texas (Oct. 3, 2014) – Wayne Dalton dealers have four new designs and a new color option to offer homeowners looking to enhance the look of their homes with the Wayne Dalton Model 6600 steel carriage house garage door.

With the addition of Kingston and Westfield designs, each available in arched and square top choices, the Carriage House Steel Collection Model 6600 offers a combined 22 different carriage house designs, five colors (white, almond, taupe, brown and the new black), and a variety of window and hardware options. Quiet, durable and stylish, the Model 6600 provides dealers and customers with a premium door that offers the highest R-value* in the Wayne Dalton Carriage House Steel Collection.

“Homeowners looking to stay on trend with colors and styles will be happy with the Model 6600’s new black finish and design options,” said Daniel Christian, sectional steel product manager for Wayne Dalton. “Not only that, but the Model 6600 offers excellent thermal efficiency to help keep homes more comfortable in the height of summer or the dead of winter.” One of Wayne Dalton’s most robust garage door models, the Model 6600 door is constructed with two layers of steel for increased sturdiness and features smooth DecaTrim II overlays that are treated to resist termites and fungal decay.

The Model 6600 also features engineering and design cues that will help to improve a garage’s thermal efficiency. Its foamed-in-place polyurethane insulation delivers a calculated door section R-value of 12.12, and its snug-fitting, tongue-and-groove section joints help to prevent wind and precipitation from entering the garage.

For more information on the Wayne Dalton Model 6600 steel garage door, visit www.Wayne-Dalton.com.

*Wayne Dalton uses a calculated door section R-value for insulated doors.
