FOR IMMEDIATE RELEASE

Wayne Dalton Adds Options to Residential Garage Door Lines *New Enhancements Provide Dealers with More Ways to Help Customers*

LEWISVILLE, Texas (April 23, 2014) – This spring, Wayne Dalton garage door dealers can offer their customers more ways to enhance curb appeal with a new color and innovative windows options for select Wayne Dalton garage doors.

Wayne Dalton is expanding customer choice even further with the addition of the color black to its Classic Steel Garage Door 8300 line. Dealers can help end-users make the right selection for their home with the choice among five different colors (white, almond, taupe, brown and black) or two textured wood grain finishes (golden oak or walnut).

Additionally, seven popular Wayne Dalton garage door models from the [Classic Steel Garage Door Collection](#) – the 9100, 9600, 8300, 8500 and 8000/8100/8200 Series Long Frame option – are getting five new window patterns that will allow for greater customization. The window designs – Arch Stockton, 8 Lite Stockton II, Stockbridge II, 8 Lite Cascade II and Waterton II – are designed with thinner mullions and less flange material around perimeter edges to provide more natural light. The new inserts also feature about 33 percent less plastic, which allows for better light transmittance and larger light appearance.

“Providing our dealer network with quality products and outstanding choice is something we focus on every day at Wayne Dalton,” said Kym Dennis, brand manager for Wayne Dalton garage doors. “Now that we have new arched-, rectangular- and diamond-window designs available on some of our most popular garage door lines, Wayne Dalton dealers can provide their customers with a level choice that is nearly unmatched by anyone else in the industry.”
