Severe storm defense

During a hurricane or severe storm, the structural integrity of your home can be compromised if wind forces cause the garage door to buckle. Help protect your home against the damaging effects of wind pressure during severe weather events with a wind-resistant garage door from Wayne Dalton.

All wind load options must be specified at time of order.

Wind load-rated garage doors

Wayne Dalton offers wind load reinforcement options with many of its most popular garage doors. Doors with the WindSafe logo comply with requirements of one or more approval agencies, including: the Florida Building Code, Texas Department of Insurance and Miami-Dade (FL) County.

Impact-rated garage doors

Wayne Dalton door models with the impact logo have been approved for impact resistance. Always consult with your local building authority to ensure compliance with local building code requirements.
Lose the garage door, lose the home
Post-storm analysis indicates that 80% of residential hurricane damage begins with wind entry into the garage.\textsuperscript{1} If the integrity of your home is compromised, wind, rain and blown debris have easy access into your home.

1. High wind events can cause un-reinforced garage doors to buckle, forcing the door out of the track and causing catastrophic door failure.

2. Debris driven by high velocity hurricane winds become powerful projectiles that can pierce ordinary garage doors breaching their integrity.

3. With wind speeds exceeding 111 mph (Category 3 or greater hurricane), the extraordinary pressure inside the home can compromise the structural integrity of walls and roof.

4. Induced internal air pressure can reach such a magnitude that it can literally blow off the roof and tear apart wall panels.

5. Window openings as small as 4 square feet can pressurize the home’s interior, exerting forces on the structure like a turbine engine.

\textsuperscript{1}Federal Alliance for Safe Homes (FLASH)\textsuperscript{®} 2014.
MODEL 6600

Carriage House Steel

The Model 6600 garage door is a terrific choice for performance and value. It has excellent insulating ability that provides thermal efficiency and reduces street noise. Choose from eleven panel options.

- Distinctive Carriage House designs
- Foamed-in-place polyurethane insulation (R-value = 12.12*)
- Durable four-layer construction
- Limited Lifetime Warranty

*Wayne Dalton uses a calculated door section R-value for our insulated doors.

All door top sections are available in arched or square design. Most double-car designs appear as 2 single-car doors side by side.

### Choose Your Style

- Arlington (Square)
- Ashburn (Arched)
- Bellview (Square)
- Brunswick (Arched)
- Savannah (Arched)
- Richmond (Square)
- Somerset (Arched)
- Springfield (Square)
- Kingston (Square)
- Westfield (Square)

### Choose Your Color

#### Painted Finishes (standard)

- White/White
- Almond/White
- Taupe/White
- Terra Bronze/White
- Brown/White
- Black/White

#### DecaTrim™ II Overlay Texture Options

- Smooth
- Wood Grain

CONTACT YOUR LOCAL BUILDING OFFICIAL FOR CODE REQUIREMENTS. SEE PAGE 32 FOR WIND SPEED / DESIGN PRESSURE NOTES.

Actual colors may vary from brochure due to fluctuations in the printing process. Always request a color sample from your Dealer for accurate color matching.
Choose Your Windows

Window patterns are shown for a typical single-car door. Spacing of windows may change depending on door size. Not all windows are available in all door sizes.

Routed windows
Routed windows are only available with smooth overlay trim.

- Clear Long
- Stockton Arch
- Stockton
- Stockbridge
- Somerton
- Wyndbridge

Framed Insert windows
Framed Insert windows are available for both smooth and wood grain overlays.

- Clear Long
- Stockton Arch
- Stockton
- Stockbridge
- Somerton
- Wyndbridge

Window Comparison
Doors built with the Routed windows use a clean top section design where the wood overlay is routed from a wood face panel.

Arlington panel with Routed Stockbridge windows

Doors with Framed Insert windows use a classic wood door design with the top section constructed from wood overlay boards.

Arlington panel with Framed Insert Stockbridge windows

Impact-resistant windows are available. (Miami-Dade Broward approved upgrade).
**MODELS 8024/8124**

**Classic Steel**

With a 24-gauge steel skin, these doors have box-shape 20-gauge stiles and 16-gauge end stiles for strength and rigidity.

- Polystyrene insulation (R-value = 3.7*) on Model 8124
- 10-Year Limited Warranty

*Wayne Dalton uses a calculated door section R-value for our insulated doors. Note: For Sonoma style doors with windows, a full row of impact windows are required.

Wind Speed / Design Pressure Notes

1. Wind speeds based on ASCE 7-05 are applicable for enclosed structures with an importance factor of 1.0, mean roof height of 30’, and assume a maximum of 2’ of the door is located within the end zone of a structure. The wind speeds are listed as a guide only. Wind speed is only one of many factors that determine the design pressure on a structure. The design and location of the structure can have a great effect on the loads placed on the garage door. Consult a registered architect or structural engineer to determine what design pressure is appropriate for your application.

2. Wind speeds based on ASCE 7-10 Category II structure with a mean roof height of 30’ and a maximum of 2’ of the door is located within the end zone of a structure. The wind speeds are listed as a guide only. Wind speed is only one of many factors that determine the design pressure on a structure. The design and location of the structure can have a great effect on the loads placed on the garage door. Consult a registered architect or structural engineer to determine what design pressure is appropriate for your application.

3. Options available on select styles.
   - Wind load drawings available upon request.
   - Wind speeds listed in this guide are provided for reference purposes only.
   
   In ALL cases the local building authority is the sole and final determiner of the structural and safety requirements, and suitability of the garage door.
**Storm Panels**

Fabric-Shield® Storm Panels are a highly-effective alternative to steel or aluminum hurricane panels. These PVC coated woven fabric panels were tested and comply with the performance requirements of specification standards ASTM E-1886*, ASTM E-1996* and ASTM E-330*. Fabric-Shield® panels are easily stored and easier to deploy. Panels are also translucent allowing diffused light to enter.

*Refer to page 2 for listing of approvals.

---

**Pull-Down Shutters**

Pull-down Shutters use Fabric-Shield® PVC-coated woven fabric in an easy-to-deploy pull down system. The low-profile shutter canisters contain each shutter when they are not in use. The pull-down shutter system is simply the fastest way to make your home storm ready.
